- understanding curriculum;
- selecting and implementing teaching / learning methods;
- evaluating (assessing) learning; and
- using WebCT Vista as a course management system.

Each session offered will include a balance of theory and opportunities to apply the theory to the development of courses. At the completion of this two-day program, faculty will have had opportunities to:

- increase their understanding of curriculum and its meaning to their course;
- learn a variety of new teaching methods;
- develop appropriate evaluation tools;
- master foundational WebCT Vista skills; and
- enhance their value to Durham College!
